

The background features a network diagram with white circular nodes connected by thin purple lines. The nodes are scattered across the frame, with some forming larger, more complex clusters. The background color transitions from a deep purple at the top to a bright pink at the bottom. The title text is centered in the upper half of the image.

Both male and female kangaroos eat the same kinds of plants. When it comes to baby kangaroos, however, there's a different answer to the question, what do kangaroos eat? Like all marsupials, baby kangaroos, called "joeys," are born before they are fully developed.

## Development Of A Kangaroo Joey

Marsupial - Wikipedia DNA evidence supports a South American origin for marsupials, with Australian marsupials arising from a single Gondwanan migration of marsupials from South America to Australia. There are many small arboreal species in each group. The term "opossum" is used to refer to American species (though "possum" is a common diminutive), while similar Australian species are properly called "possums. Kangaroo - Wikipedia The kangaroo is a marsupial from the family Macropodidae (macropods, meaning "large foot"). In common use the term is used to describe the largest species from this family, especially those of the genus Macropus: the red kangaroo, antilopine kangaroo, eastern grey kangaroo, and western grey kangaroo. Kangaroos are indigenous to Australia. The Australian government estimates that 34.3 million. GreatFacts.com - Amazing Facts A list of thousands of interesting and amazing facts.
